Summary

I am an accomplished and driven UX professional with over 15 years of experience in UX design and project management. In my previous role as the UI/UX Manager at the International City/County Management Association (ICMA), I managed the user experience of multiple websites, guided teams in web strategy, collaborated with staff ensuring consistency in design standards and best practices, and directed external vendors in delivering high-quality web solutions. I audit digital experiences, conduct usability studies, design prototypes and develop processes. In addition to UX design, front-end development (HTML and CSS) and project management experience, I am proficient with Axure, Figma, Drupal, WordPress, Shopify, and Adobe Creative Suite.

Professional Experience

International City/County Management Association (ICMA) | Washington, DC

International City/County Management Association, www.icma.org, headquartered in Washington, DC is the world's premiere association of professional city and county managers who lead local governments.

User Interface/User Experience (UI/UX) Manager | January 2020 - January 2025

Web Designer | December 2015 – January 2020

- Managed the UI/UX design of six (6) websites within the ICMA Ecosystem focused on engaging human-centered, user friendly, web accessibility and visually appealing experiences.
- Designed wireframes, mockups, and prototypes to articulate the user's journey; gathered feedback from usability studies and implemented feedback based improvements.
- Audited existing and new digital experiences, identified obstacles, and proposed solutions for improvement to align with best practices and guidelines.
- Guided four (4) cross-functional teams using web strategy and an understanding of systems thinking to gather business requirements and communicate high-level concepts in a clear and compelling way to senior leadership and audiences of all levels.
- Collaborated with a team of over 30 cross-functional staff to ensure design standards and best practices are followed in the day-to-day operations of ICMA websites. Wrote guidelines for content management; conducted content management system (CMS) training for staff;

managed bug reports; and resolved 800+ tickets.

- Directed external vendors who provide technical support of ICMA websites to set priorities, managed a \$70K annual budget, coordinated resources, and provided guidance to deliver high-quality web solutions.
- Generated weekly metric reports, analyzes for trends and opportunities, guarantees content is optimized for search engine optimizations (SEO) for better search visibility and cross-promotion among the ICMA digital ecosystem.
- Created 30+ high-quality branded videos that support ICMA message, including but not limited to: CEO/Executive Director communications, member testimonials, advocacy for programs, and internal awards.

National Association of Social Workers | Washington, DC

Senior Digital and Web Specialist | April 2014 – November 2015

- Responsible for the design and maintenance of the organization's website.
- Designed three interactive brand experiences for the website and microsites in close collaboration with the web operations team.
- Collaborated with marketing team and stakeholders to create concepts that met goals and expectations.
- Built, launched and maintained webpages with a high standard for digital touch points, from concept to execution.
- Created wireframes, high-fidelity mock-ups, specifications and other UI design documents.

Dynamics Research Corporation | Washington, DC

Web Designer | October 2010 – April 2014

- Designed and maintained the website for the Military Health System, Office of Strategic Communications.
- Developed and designed micro-sites to provide web presence for affiliate organizations.
- Created illustrations and information graphics such as maps, charts, and graphs for web data projects.
